**HAYNES® INTRODUCES NEW WEBSITE FOR 2014**

WESTLAKE, OH USA- Haynes® Manufacturing Company launched the first phase of their new website in February. The new site features a streamlined ordering process, events schedule and the latest news. Users of the site will also be able to have instant access

to Technical Data Sheets, Safety Data Sheets as well as all current authorizations and certifications.

Founded in 1936 Haynes® began manufacturing lubricants and specialty parts to the developing dairy industry. Today Haynes® is the leading manufacturer of premium food grade lubricants that are sold through original equipment manufacturers and distributors worldwide in over 110 countries.

Haynes® is committed to providing customized solutions in food-grade lubricants worldwide. Our dedicated associates provide unmatched customer service and quality lubricants that surpass required standards for the food processing, food-service, pharmaceutical, and cosmetic industries.

Haynes® offers their customers a wide selection of food-grade lubricants from light duty oils to extreme pressure/high temperature greases including white oils, white food-grade greases, silicone spray and everything in between. Customers can also choose from a variety of convenient packages, including aerosol cans, tubes, cartridges, pails and drums. Haynes® lubricants contain no animal or vegetable fats, are absolutely neutral, and will not turn rancid, contaminate or taint when in contact with food product. They are specifically formulated with the highest quality base oils and additives to meet the unique demands placed on all types of food processing equipment. Haynes® lubricants are NSF rated H1 & 3H, Kosher Certified, Halal Certified, and made from ingredients that are FDA approved. Haynes is a welcomed addition to any HACCP Plan.
